June 2008

News and Events from Kent State University

Welcome to Profiles of Excellence in Action, a monthly e-newsletter showcasing news and events from Kent State University. In this month's e-newsletter, learn about Kent State's leadership role in a $14.5 million project to study liquid crystals and soft matter, a unique dual-degree program in language translation and business administration, a donation of priceless photographs from Andy Warhol's collection and an invention that is offering individuals with disabilities a newfound independence.

Kent State Awarded $14 Million for Study

Kent State will lead a partnership of eight Northeast Ohio entities in a $14.5 million Ohio Research Scholars Program project to establish a Research Cluster on Surfaces in Advanced Materials. Read more about the project.

Device Helps Disabled Turn on Computers

A device invented by Dr. Joseph Drew, Kenneth McElravy and Ron Franklin at Kent State Trumbull helps individuals with physical disabilities turn on computers. Read more about the device.

New Dual Master's-Degree Program First of Its Kind

Kent State's dual-degree program in language translation and business administration is the first of its kind at a public or private university in the United States. Read more about the dual-degree program.
Education, Nursing and Business Remain Top Majors

While many students change their minds about an ultimate career choice, they eventually select from among the same top majors. And that list has remained constant over the years. Read about the top majors.
